Tests	Result	Reference Ranges
RT - PCR for Covid 19		
Specimen :-	Nasopharyngeal & Oropharyngeal Swab	
Report :-	NEGATIVE	

Principle: The Covid-19 RT -PCR is a Taqman Based reverse transcriptase polymerase chain reaction for qualitative detection of nucleic acid from SARS Cov 2 in upper & lower respiratory tract infections. Covid -19 test done on ICMR/CE-IVD/USFDA approved kits.

ICMR REGISTRATION NO FOR COVID-19 TESTING IS DRSSTCRJ.

[Negative results do not rule out SARS Cov-2 infection as they can be due to presence of inhibitors, mutation & insufficient nucleic acid]
